Profile

B.Tech Computer Engineering student (7th Semester, CGPA: 8.9) with hands-on experience in Android app development, frontend technologies, prompt engineering, and data mining tools. Skilled in developing responsive user interfaces and implementing logical solutions. Eager to secure an internship position where I can enhance my technical expertise and contribute to innovative projects.

Education

B.Tech Computer Engineering, UKA TARSADIA University
CGPA: 8.9

2023 – 2027
uka tarsadia university

Skills

Programming Development

PHP , javascript , HTML , CSS

Database Systems

MongoDB, GITHUB, Data mining tools

Soft Skills

Team Collaboration, Communication, Leadership, Problem Solving

Frontend Development

HTML, CSS, Javascript, UIUX

Tools

Android Studio, Git, GitHub, VS Code, BLACKBOX AI

Professional Experience

Web Development Intern, National Informatics Centre (NIC)

05/2026 – 07/2026

- Developed the Sugam Citizen Service Portal using PHP (CodeIgniter 4), HTML, CSS, JavaScript, Bootstrap, and MySQL.
- Designed responsive and user-friendly web interfaces.
- Implemented citizen service modules with secure database integration.
- Participated in testing, debugging, and performance optimization.
- Collaborated with mentors and followed software development best practices.

I also recommend improving your resume by:

- Adding an Experience section for the internship.
- Updating the Summary to mention your internship experience.
- Adding the Sugam Citizen Service Portal project.
- Making the resume ATS-friendly with a cleaner, more professional one-page layout.

Projects

Destiny AI – Intelligent Relationship & Compatibility Insights,

Frontend (HTML, CSS, JavaScript) / React (if used), Prompt Engineering, Data Handling

- Users often struggled to understand relationship compatibility and personal traits; developed Destiny AI, an AI-driven platform that provides compatibility insights based on user inputs and intelligent prompts.
- Traditional compatibility tools lacked personalization; implemented dynamic input-based analysis and prompt-engineered responses to generate meaningful relationship insights.
- Static interfaces reduced user engagement; designed a responsive and interactive frontend for smooth user experience across devices.
- Optimized logical flow and frontend performance; ensured fast interaction, clear insights, and improved user decision-making experience.

Anna on Wheels – Android Food Ordering Application,, Tech Stack: Java | MySQL | Android Studio

- Developed a food ordering application with secure order management.
- Implemented menu browsing, order tracking, and payment workflow.
- Designed backend database for efficient order handling.
- Improved application performance and user experience.

Certifications

- AWS Academy Graduate: AWS Academy Cloud Foundations
- Web Development Internship Completion Certificate – National Informatics Centre (NIC)

Achievements

- Successfully developed an AI-assisted compatibility analysis system that provides personalized insights.
- Improved user engagement through responsive UI and interactive input-based results.

- Applied prompt engineering techniques to generate structured and meaningful compatibility responses.
